**Thickness:** 20mm

**Primary Use:** Bathrooms, Kitchen Back splashes, Fireplaces, walls, Lobbies, Commercial spaces

BRAZILIAN BLACK SLATE

# RUSTIC SLATE

Embrace the rugged, untouched beauty of nature with our Rustic Slate. This material is defined by its pronounced, natural cleft surface, where the slate layers have been split to reveal a striking three-dimensional texture. The uneven, tactile finish is a hallmark of authentic, traditional slate, offering a powerful, earthy presence. Its color palette typically features a rich blend of muted tones—deep grays, earthy greens, soft browns, and occasional rust highlights—that change subtly with the light. Perfect for creating cozy, farmhouse-style interiors or character-rich exterior paving where a non-slip, deeply textured surface is desired.

## Characteristic

**Color Range:** Copper, deep charcoal, earthy gold & muted tones.

**Finish Options:** Natural

**Standard Sizes:** 600×900, Mix pack

**Thickness:** 20mm

**Primary Use:** farmhouse exteriors, outdoor garden walls, rustic cafes, fireplaces and entry cladding.

## RICH HUES AND DEEP CHARACTER

For areas demanding supreme resilience and a reliable surface, our Rustic Finish Slate is the ideal choice. The cleft face is not just an aesthetic feature; it naturally provides excellent slip resistance, making it exceptionally safe for exterior applications, pool surrounds, and wet areas. As a true metamorphic rock, it boasts high density and low water absorption, ensuring outstanding performance against frost and harsh weather. Its inherent variations in color and texture effectively camouflage dirt and wear, offering a beautiful, low-maintenance solution that improves with age.

---

FEATURES	BENEFITS	APPLICATIONS
<b>Exceptional Durability</b>	Highly resistant to wear, tear, and abrasion. Long-lasting, even in high-traffic areas.	Flooring, Patios, Walkways, Roofing
<b>Low Water Absorption</b>	Naturally highly impermeable, making it extremely resistant to frost damage and moisture.	Roofing, Exterior Cladding, Kitchens, Bathrooms, Pool Surrounds
<b>Natural Slip Resistance</b>	Cleft/natural finishes provide an inherent textured surface.	Flooring (especially wet areas), Patios, Stairs
<b>Rich, Natural Texture</b>	The unique 'cleft' surface creates a distinct, earthy aesthetic.	Feature Walls, Flooring, Stone Ledgers
<b>Fire &amp; Heat Resistant</b>	A non-combustible material with high thermal stability.	Fireplaces, Hearths, Kitchen Countertops, Grill Surrounds
<b>Color Stability</b>	Many varieties are "unfading," maintaining their color over Decades.	Exterior Cladding, Roofing
